## **GITZO GM5561T: THE HIGH PERFORMANCE MONOPOD FOR SPORTS PHOTOGRAPHERS**

If you want to anticipate the action, you need to understand the sport and its rules. Having the right equipment is crucial for the timing and precision of your shot. Nobody understands this better than Gitzo, the brand that has become a worldwide representation of photographic excellence. Gitzo's state-of-the-art technologies bring the new GM5561T monopod, with exceptionally compact dimensions and ideal support when you need to capture the action.

Thanks to its Anti-Leg Rotation (ALR) and G-Lock systems, the new GM5561T monopod can be opened and closed extremely fast, plus you can quickly and precisely adjust the height if you suddenly need to change your angle. It can support the weight of the heaviest and bulkiest lens with no problem, yet it is still lightweight, sturdy and compact.

The new monopod is also equipped with ultra-light 100% Carbon 6X tubes, the new aluminum 'Power Disc' that cuts vibrations and improves tripod-to-head lock, and a handy belt clip so photographers can hang the monopod from a belt or pocket, leaving their hands free.

The GM5561T monopod's minimum length is just 41 cm, but with a few quick moves can be extended to 153.5 cm. It only weighs 780 g, but can support payloads of up to 25 kg.

### **GM5561T Monopod** **technical details**

Max Height	155 cm / 61 in
Closed Height	41.5 cm / 16.3 in
Weight	0.75 kg / 1.65 lb
