New Manfrotto Lightweight Stands with Quick Stack System

Stack 'em, pack 'em, to go or stow!

Introducing another product innovation from Manfrotto—Lightweight Stands with a patented Quick Stack System!

The patented Quick Stack System (QSS) connects the stands together to save room while storing them. The QSS makes the stands extremely portable allowing for multiple stands to be carried at once in a compact case to easily bring them with you for outdoor shooting.

Their lightweight and compact-size make these stands a practical tool for your lighting support needs. The lightweight stand range consists of 7, 8, 9 and 12' stands which can be purchased as singles or in 3-packs.

< The lightweight stands also come with a stacking system leg lock which has a stronger and more ergonomic handle. This makes it easier to secure stands into the operating position.

< Locking and unlocking the stands is simple and easy to do. Push on the new locking device (Manfrotto Logo located on the top Spider casting) and detach one stand for quick usage.

A 3/8" screw top female to 1/4" adapter male allows additional accessories to be connected to the stand. >
