

## Amplis distributes Paterson Darkroom

Amplis Foto is now the Canadian distributor for the Paterson Darkroom line of processing equipment.

**Paterson Darkroom** is best known for the high quality darkroom equipment it manufactures in the UK. Paterson aims to supply photographic dealers and end users a first class product.

This move comes closely behind the distribution by Amplis of Ilford Photo by Harman technologies. As Ilford produces black and white films, papers and photochemistry, the partnership of Ilford with Paterson was created to increase access to darkroom equipment and support analogue photography across Canada through Amplis. Paterson is proof that darkroom continues to thrive beside the digital darkroom.

For nearly sixty years Paterson has specialised in the supply of well made equipment available for the modern darkroom. Paterson products are used in Home darkrooms and Educational Institutions around the world, and renowned for their quality.

The comprehensive range of products includes film developing tanks, measuring graduates, film and print washing equipment. All of the darkroom plastics are manufactured by Paterson, for Paterson in their UK factory.

Items available include film processing, print exposure and processing, chemical mixing as well as other darkroom accessories.

---

Paterson products are distributed in Canada by Amplis Foto.

Amplis Foto has celebrated its 25th anniversary as a leading photographic marketing and distribution company.
