

Introducing the

Stick & Stretch

Patent pending

Made in Canada

Canvas Gallery Wrap System

Stick and Stretch is an innovative NEW product which allows you to "Gallery Wrap" your Canvas or other laminated images quickly and cleanly. No special tools are required and with a bit of practice you can produce a professional quality wrap in less than five minutes! Seeing is believing.

Gallery wraps are photos printed onto canvas and then mounted on a frame with the image wrapped around the edge of the frame. The look is very modern and is becoming extremely popular. Gallery wraps can be mounted unframed or they can be framed as a traditional art print.

Gallery wraps have previously been restrictive because stretching required very specialized skills and tools to do a proper job so customers would have to source out custom framers.

With the new gallery wrap system you can print on the canvas and stretch the canvas on to the stretcher bars in about 5 minutes – in house! There are no special tools – you just need the mounting brackets and an Exacto knife. The wrapping system is so easy to use that anyone can produce beautiful professional gallery wraps after only 10 minutes of training.

All stretcher sticks are sold in packs of one length which will make a square frame. To create a rectangular frame you can purchase the second length separately. SS-KIT or SSP-KIT PRO corners are required to position the sticks correctly. The standard Stick and Stretch can be used for 8" up to 24" square, with the PRO version designed for larger size wraps up to 60".

Stick and Stretch products are distributed in Canada by Amplis Foto Inc.
