

FOR IMMEDIATE RELEASE
July 2, 2008

Arctic Butterfly SL700 & 7x Sensor Loupe Combo

VisibleDust is proud to offer the ultimate combo package for the detection and removal of debris from your DSLR sensor. The BriteVue XL Sensor Loupe, with its 7x K9 lens and array of 6 powerful LEDs is the perfect tool for locating dust on your sensor. Removal of any contaminants has never been easier than with the Arctic Butterfly SL700 with its SCF technology that draws dust to the bristles away from the sensor.

The SensorLoupe™ 7X has six super bright LEDs with vari-angled orientation to help create a 3D image of dust particles. SensorLoupe™ 7X even makes it possible to locate the smallest dust particles that can ruin even ultra-high resolution images.

With this combo, you can detect and remove dust so your images are free from unwanted spots in minutes.

Visible Dust products are distributed in Canada by Amplis Foto Inc.

Amplis Foto is celebrating its 25th anniversary as a leading photographic marketing and distribution company.

About Amplis
